1. Study Overview

1.1 Background & Aims

The COVID-19 Social Study commenced on 21st March 2020 in response to the outbreak of the novel coronavirus disease (COVID-19). It is a large scale longitudinal panel study of adults aged 18 and over living in the UK. The study was established with five core aims:

1. To understand the psychological and social impact of Covid-19
2. To map how the psychosocial impact evolves over time as social distancing and lockdown measures were introduced and relaxed
3. To ascertain which groups were at greatest risk of adverse effects
4. To explore the interaction between psychosocial impact and adherence to healthy and protective behaviours
5. To identify protective activities during isolation that could buffer against adverse effects

Participants provide an email address on first enrolling and complete an online questionnaire. They are then automatically re-contacted at this address every week for follow-up questionnaires in order to explore trajectories over time. Data are anonymised prior to analysis.

The study ask baseline questions on the following:

- Demographics including year of birth, sex, ethnicity, relationship status, country of dwelling, urban/rural dwelling, type of accommodation, housing tenure, number of adults and children in the household, household income, education, employment status, pet ownership, and personality
- Health and behaviours including pre-existing long-term physical health conditions, diagnosed mental health conditions, pregnancy, smoking, alcohol consumption, physical activity, caring responsibilities, usual social behaviours, and social network size

It also asks repeated questions every week on the following:

- Covid-19 status including whether the respondent has had Covid-19, whether they have come into likely contact with Covid-19, current isolation status and motivations for isolation, length of isolation, length of time not leaving the home, length of time not contacting others, trust in government, trust in the health service, adherence to health advice, and experience of adverse events due to Covid-19 (including severe illness within the family, bereavement, redundancy, or financial difficulties)
- Mental health including wellbeing, depression, anxiety, which factors were causing stress, sleep quality, loneliness, social isolation, and changes in health behaviours such as smoking, drinking and exercise
- How people are spending their time whilst in isolation, including over questions on working, functional household activities, care and schooling of any children in the household, hobbies, and relaxation

Certain weeks of the study also include one-off modules on topics including:

- Volunteering behaviours
- Control, frustrations and expectations
- Coping style
- Fear of COVID-19
- Resilience
- Arts and creative engagement
- Life events
- Optimism
- Locus of control
- Emotional intelligence
- Weight
- Gambling behaviours
- Mental health diagnosis
- Use of financial support
- Region
- Faith and religion
- Relationship
- Neighbourhood
- Healthcare
- Lockdown holiday
- Discrimination
- Life changes
- End of July (financial support, volunteering, art, gambling & mental health)

Throughout the pandemic in the UK, the study has provided weekly research reports and updates to the Cabinet Office, other departments within government, Public Health England and the World Health Organisation as well as making results publicly available on the study website.

This User Guide provides detailed information pertaining to the UCL COVID-19 Social Study data.

1.2 Funding

The COVID-19 Social Study is funded by the Nuffield Foundation [WEL/FR-000022583] and the Wellcome Trust [221400/Z/20/Z] and also receives supplementary support from UK Research and Innovation through the MARCH Mental Health Research Network [ES/S002588/1].

1.3 Ethical clearance

Ethical approval for the study was granted by the UCL Research Ethics Committee [12467/005] and the study is fully GDPR compliant, running through a REDCap secure software programme within a data safe haven.

1.4 Contact details

Any queries related to the study should be sent to: covid19-study@ucl.ac.uk

2 Sample

2.1 Sample design

The study is not random and therefore is not representative of the UK population. But it does contain a well-stratified sample that was recruited using three primary approaches.

1. First, snowballing was used, including promoting the study through existing networks and mailing lists (including large databases of adults who had previously consented to be involved in health research across the UK), print and digital media coverage, and social media. This included advertising the study through databases of adults who had previously consented to be involved in health research (such as UCL BioResource and HealthWise Wales) and through the UKRI Mental Health Research Networks.
2. Second, more targeted recruitment was undertaken focusing on (i) individuals from a low-income background, (ii) individuals with no or few educational qualifications, and (iii) individuals who were unemployed. This was achieved through partnership work with targeted advertising companies and recruitment companies who provided pro-bono support for the study, including Find Out Now, SEO Works, FieldworkHub, and Optimal Workshop. **However, no participants were paid to participate in the study.**
3. Third, the study was promoted via partnerships with third sector organisations to vulnerable groups, including adults with pre-existing mental health conditions, older adults, carers, and people experiencing domestic violence or abuse. This included utilising partnerships from the 1,500-strong membership of the UKRI MARCH Mental Health Research Network.

No proxy interviews were carried out, so the study was not available to individuals without access to the internet.

2.2 Study design

The study commenced as a weekly survey, with participants automatically receiving an invitation to the next wave of data collection 7 days following their last completion. All participants received 2 reminders (24 and 48 hours following their initial weekly invitation). If they did not complete following these reminders, they stopped receiving future surveys. But their link to their last reminder remained live so they could return to the study a few days late if they chose. For this reason, date is recommended to be modelled within analyses that look at longitudinal follow-up so as to take account of whether responses were precisely 7 days apart or not.

Following week 22 of the study, the study changed from weekly follow-up to monthly follow-up. In order to still have a spread of responses across the weeks, participants were randomised to receive their first monthly invitation in week 1, 2, 3 or 4 of the month, with subsequent invitations following on 28 days after they completed the survey. We re-approached all participants who had been lost to

follow-up but who had not formally unsubscribed from the study to take part, so the sample size increased following this alteration to the study design.

2.3 Cleaning

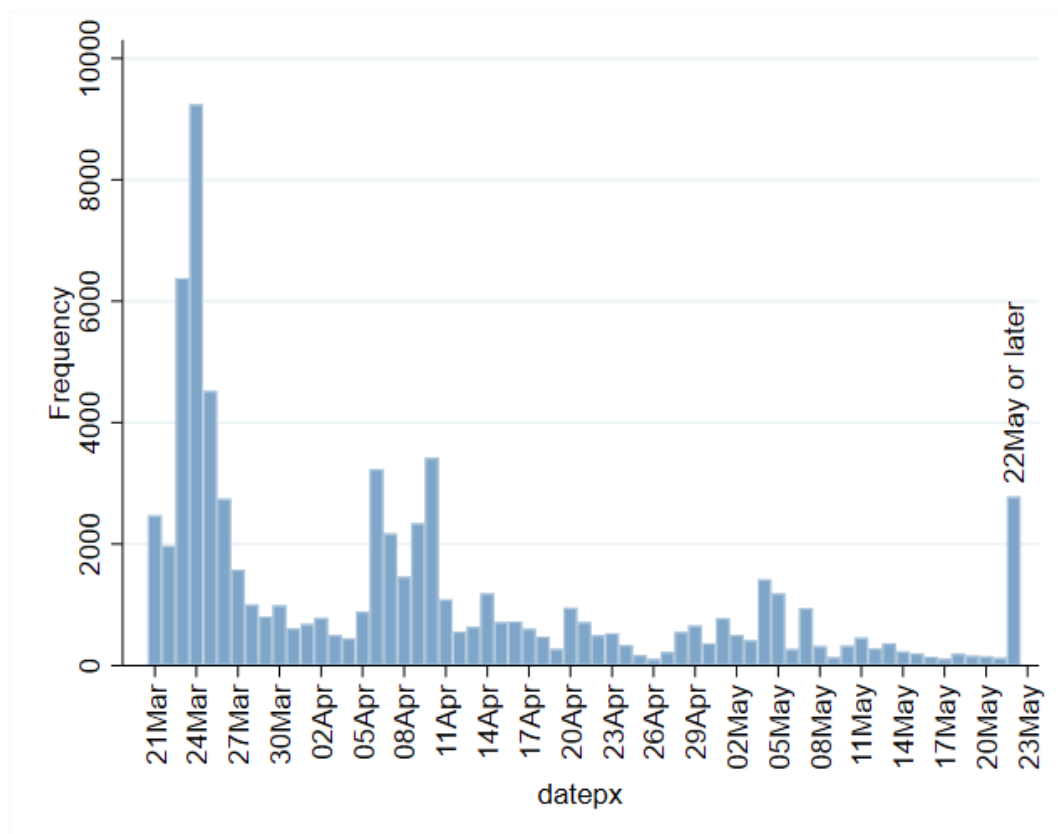

A number of checks on the data were performed, with responses failing these checks being eliminated before any counting of the total sample size took place.

To confirm age eligibility, we asked about age including ages under 18, and excluded any responses from those too young to participate. To confirm country of origin, we similarly asked about country of residence and excluded any outside of the UK.

The system required an email address to be entered before any study material could be provided. Participants were barred from completing the study until a legitimate email address was provided. However, we lack information on how many survey invitations for subsequent weeks were rejected from email accounts (for example due to typographical errors in emails or non-working email accounts). Nevertheless, all data were checked for duplicate email addresses, and all duplicates were removed.

2.4 Recruitment rate

Participants could join the study on any date from 21st March onwards (see Figure below). Active recruitment using the techniques described in section 2.1 was continued for the first 8 weeks of the study and then stopped. Date of joining is denoted with the variable 'datepx'. Their first survey completed is denoted as 'wave' 1, with subsequent responses on subsequent weeks being labelled as 'wave' 2, 3 etc. The variable 'wave' was derived from the original variable, 'redcap_event_name'.

The week of joining the study is denoted with the variable 'week' derived from the date variable 'datepx'. The baseline week was defined as the first survey week, from 21/03/2020-27/03/2020 (as shown below). Please note that a small number of participants have repeated week values. This is problematic if using 'xtset' with week. This will be addressed in future cleanings of the dataset, but for the present users are left to decide how to deal with these cases.

Week	Date
1	21/03-27/03/2020
2	28/03-03/04/2020
3	04/04-10/04/2020
4	11/04-17/04/2020
5	18/04-24/04/2020
6	25/04-01/05/2020
7	02/05-08/05/2020
8	09/05-15/05/2020
9	16/05-22/05/2020
10	23/05-29/05/2020
11	30/05-05/06/2020
12	06/06-12/06/2020
13	13/06-19/06/2020
14	20/06-26/06/2020
15	27/06-03/07/2020
16	04/07-10/07/2020
17	11/07-17/07/2020
18	18/07-24/07/2020
19	25/07-31/07/2020

20	01/08-07/08/2020
21	08/08-14/08/2020
22	15/08/20-21/08/20
*Survey switched to monthly follow-up	
23	22/08/20-28/08/20
24	29/08/20-04/09/20
25	05/09/20-11/09/20

If a participant joined the study later, say in week 4, s/he would commence with 'wave' 1, but in 'week' 4, so would be treated as missing from weeks 1 to 3.

Alternatively, users could also fix the time variable on a specific date, for example the starting point of the study (21/03/2020) or the lockdown (23/03/2020). This can be derived by using the following Stata command:

```
gen day=datepx-mdy(03,21,2020)
or
gen day=datepx-mdy(03,23,2020)
```

2.5 Response rate

Out of a total of 100,943 individuals who landed on the consent page for the study, 97,953 consented to take part, and 73,265 commenced the study and provided data at one or more waves.

Data provided is either complete or incomplete. The variable 'date' indicates when survey participants **completed** a survey for a particular wave. It was derived from the time-stamp variables, 'your_experience_dur_v0', 'your_experience_dur_v2' and 'your_experiences_2_timestamp' which were automatically generated by the REDCap system on completion of a survey.

The variable 'date' differs from 'datepx' in that 'datepx' included participants who started a survey for a particular wave but did not complete it. These non-completed surveys are not assigned an official timestamp by REDCap. For 'date' they are listed as '[not completed]' but for 'datepx' missing dates were imputed based on the time stamp for completing the first part of the questionnaire, or based on the time stamps of previous or later waves assuming that the follow-up was strictly 7 days.

These incomplete cases can be dropped by using the following Stata command:

```
drop if date==.
```

As participants joined the study on different days and therefore received weekly invitations to continue participation on different days, surveys were completed across every day of the week from the start of the study. The number of surveys completed on each day (up to 21 August 2020) is shown below:

datepx	Freq.	datepx	Freq.	datepx	Freq.	datepx	Freq.

19-Apr-20	3,330	28-May-20	5,106	06-Jul-20	4,324	14-Aug-20	3,131
20-Apr-20	5,127	29-May-20	4,678	07-Jul-20	3,973	15-Aug-20	2,893
21-Apr-20	6,963	30-May-20	3,774	08-Jul-20	4,176	16-Aug-20	3,364
22-Apr-20	6,742	31-May-20	4,193	09-Jul-20	4,103	17-Aug-20	3,794
23-Apr-20	6,459	01-Jun-20	4,472	10-Jul-20	3,717	18-Aug-20	3,438
24-Apr-20	5,644	02-Jun-20	4,966	11-Jul-20	3,314	19-Aug-20	3,468
25-Apr-20	4,399	03-Jun-20	5,472	12-Jul-20	3,571	20-Aug-20	3,197
26-Apr-20	3,481	04-Jun-20	4,780	13-Jul-20	4,363	21-Aug-20	2,942
27-Apr-20	4,390	05-Jun-20	4,531	14-Jul-20	3,947		
28-Apr-20	6,181	06-Jun-20	3,891	15-Jul-20	3,972		

The study moved to monthly follow-ups after 21st August so recruitment was shut and analysis moved from daily to weekly.

2.6 Retention rate

The variable 'wave' indicates the sequence of repeated responses for each participants. The baseline response is when 'wave' equals 1. As participants could join the study at any point, the response rate across waves is changing daily while the study is open. **Once study recruitment is complete, we will calculate complete response rates for each wave.**

As of 7 September 2020, the numbers of responses across each wave is as follows. NB the % of participants shown in columns 4 and 5 does not represent a simple retention rate as participants have all joined at different dates across the study period so not everybody has had the 'opportunity' to complete multiple waves of data yet. Each week more participants move through the study from previous weeks, increasing the overall numbers who have maintained study engagement.

Wave	Freq.	% of total Obs.	% of Wave 1 participants	% with Follow-ups
1	72,664	10.64	100.00	80.10
2	58,646	8.59	80.71	87.11
3	50,972	7.46	70.15	89.74
4	45,705	6.69	62.90	91.97
5	41,917	6.14	57.69	92.82
6	39,002	5.71	53.67	93.61
7	36,155	5.29	49.76	95.15
8	35,005	5.13	48.17	95.64
9	33,478	4.9	46.07	96.02
10	32,144	4.71	44.24	96.25
11	30,940	4.53	42.58	96.25
12	29,781	4.36	40.98	95.83
13	28,540	4.18	39.28	95.59
14	27,282	3.99	37.55	93.20
15	25,428	3.72	34.99	90.81
16	23,090	3.38	31.78	90.24
17	20,837	3.05	28.68	87.69
18	18,273	2.68	25.15	80.42
19	14,696	2.15	20.22	69.12
20	10,157	1.49	13.98	63.72
21	6,473	0.95	8.91	27.24
22	1,763	0.26	2.43	--

NB Wave 22 was an incomplete week so participants did not have equal opportunity to participate before the study switched to monthly rather than weekly follow-up. Wave 23 onwards was a monthly wave, consisting of data collected over a period of 4 weeks. As the full sample was re-contacted, the completion rate also increased:

Wave	Freq.	% of total Obs.	% of Wave 23 participants	% with Follow-ups
23	17,906	100.00	100.00	In progress

The total number of participants providing data during each calendar week is shown below (NB the numbers were correct until 9am on 7 September 2020, so this week does not have complete data yet).

Date	Week	Freq.
21/03-27/03/2020	1	28,925
28/03-03/04/2020	2	27,875
04/04-10/04/2020	3	38,172
11/04-17/04/2020	4	38,461
18/04-24/04/2020	5	38,504
25/04-01/05/2020	6	36,513
02/05-08/05/2020	7	36,656
09/05-15/05/2020	8	37,547
16/05-22/05/2020	9	35,728
23/05-29/05/2020	10	33,287
30/05-05/06/2020	11	32,188
06/06-12/06/2020	12	31,295
13/06-19/06/2020	13	30,208
20/06-26/06/2020	14	29,133
27/06-03/07/2020	15	28,513
04/07-10/07/2020	16	27,533
11/07-17/07/2020	17	26,705
18/07-24/07/2020	18	25,951
25/07-31/07/2020	19	24,974
01/08-07/08/2020	20	24,501
08/08-14/08/2020	21	23,824
15/08-21/08/2020	22	23,096
22/08-28/08/2020	23	10,494*
29/08/20-04/09/20	24	9,096
05/09/20-11/09/20	25	In progress

*NB Following week 22, the study was changed from weekly to monthly follow-up, with participants randomised into whether they completed their surveys in weeks 1, 2, 3 or 4 of each month. This increased the overall sample size still participating in the study but decreased the participants each calendar week.

2.7 Participant characteristics

The demographics of study participants across every wave are presented below.

As the study used a nonprobability sampling design, we recommend that all analysis should be conducted on weighted data to compensate for the difference in response probability in the UK population.

The dataset contains a cross-sectional weight variable (w1wgt) for all baseline participants (wave==1). The cross-sectional weighting was implemented by using the Stata user written command 'ebalance'¹. The weighted data were matched to population statistics for the following domains:

- Age
- Gender
- Ethnicity
- Education
- Country of living

Source:

<https://www.ons.gov.uk/peoplepopulationandcommunity/populationandmigration/populationestimates/datasets/populationestimatesforukenglandandwalesscotlandandnorthernireland>

Once the study finishes, we will also calculate longitudinal weights to take account of respondents at previous waves who were lost through non-response or withdrawal from the study.

¹ Hainmueller J, Xu Y. Ebalance: A Stata package for entropy balancing. Journal of Statistical Software. 2013 Sep 1;54(7).

		Total Obs (N)	Wave 1		Wave 2		Wave 3		Wave 4	
			Unweighted	Weighted	Unweighted	Weighted	Unweighted	Weighted	Unweighted	Weighted
Age	18-29	44,220	10.87%	19.49%	8.90%	15.41%	7.54%	12.60%	6.96%	11.43%
	30-45	169,133	31.26%	26.11%	29.28%	24.51%	27.59%	22.89%	26.14%	21.59%

3 Measures

Note: The survey completion dates might exceed the module time ranges for a small number of participants. This is because participants are allowed to complete half the survey and return a few days later. As such their module data will have been captured within the dates the module was live, but it will not be clear on which date within the week the questions were completed. Data users are encouraged to consider the module questions for these participants as being completed on the last date for the relevant module if including dates within analyses for these variables.

3.1 Study timeline

The study was launched with an initial questionnaire which included a slightly reduced number of the full study questions. In the two weeks following, the full list of questions was added and several questions underwent minor clarifications. The timeline of these is shown in the figure below in orange. One month after the study began, rotating modules were introduced (shown in the figure below in green). These came in just for a week.

The full measures and data dictionary for the study is shown in the Appendix.

3.2 Derived variables

In addition to the time variables, date, wave and week, other derived variables are also available in the dataset. These include:

- female
- non-white (binary ethnicity variable)
- age (derived from year of birth, capped at 90)
- agegrp3 (age dichotomized into 3 groups)
- agegrp4 (age dichotomized into 4 groups)
- edu (derived from education, 3 groups)
- lowincome (household income<30k)
- overcrowd (room per person<12)
- alone (binary variable indicating if living alone)
- status (living status)
- employed (binary variable, derived from 'employment')
- keyworker
- carer
- ltc_p (binary indicator—diagnosed physical condition)
- ltc_m (binary indicator—diagnosed mental condition)
- ltc_none (binary indicator—no physical or mental condition)
- GAD (sum score of the GAD-7 scale)
- anx (binary, $GAD \geq 10$)
- PHQ (sum score of the PHQ-9 scale)
- depress (binary $PHQ \geq 10$)
- lonely (sum score of the UCLA-3 scale)
- support (sum score of perceived social support)
- BFI_n (sum score of the BFI-15, neuroticism)
- BFI_e (sum score of the BFI-15, extraversion)
- BFI_o (sum score of the BFI-15, openness to experience)
- BFI_a (sum score of the BFI-15, agreeableness)
- BFI_c (sum score of the BFI-15, conscientiousness)
- CAS (sum score of the Coronavirus Anxiety Scale)
- RES (sum score of the resilience scale)

- COP_dis (Self-distraction (sum score of cop1 & cop19))
- COP_act (Active coping (sum score of cop2 & cop7))
- COP_den (Denial (sum score of cop3 & cop8))
- COP_sub (Substance use (sum score of cop4 & cop11))
- COP_emo (Emotional support (sum score of cop5 & cop15))
- COP_ins (Instrumental support (sum score of cop10 & cop23))
- COP_beh (Behavioral disengagement (sum score of cop6 & cop16))
- COP_ven (Venting (sum score of cop9 & cop21))
- COP_pos (Positive reframing (sum score of cop12 & cop17))
- COP_pla (Planning (sum score of cop14 & cop25))
- COP_hum (Humor (sum score of cop18 & cop28))
- COP_acp (Acceptance (sum score of cop20 & cop24))
- COP_rel (Religion (sum score of cop22 & cop27))
- COP_sbm (Self-blame (sum score of cop13 & cop26))

3.3 Missing data

Our study required completion of every question on every page for participants to proceed, so there are generally no missing items in any measures. The exceptions to this are some of the revolving modules where particularly sensitive questions were made optional, and incomplete records, whereby people who started a weekly survey and then were unable to complete it for any reason did not provide data across all the measures.

Appendix

Data Dictionary

Section 1: Baseline Only

Variable name	Question/variable label	Choices/label values
sex	What is your gender?	1, Male 2, Female 3, Other / prefer not to say
ethnicity	What is your ethnicity?	1, Asian/Asian British - Indian, Pakistani, Bangladeshi, other 2, Black/Black British - Caribbean, African, other 3, Mixed race - White and Black/Black British 4, Mixed race - other 5, White - British, Irish, other 6, Chinese/Chinese British 7, Middle Eastern/Middle Eastern British - Arab, Turkish, other 8, Other ethnic group 9, Prefer not to say
marital	What is your relationship status?	1, Single, never married 2, Single, divorced or widowed 3, In a relationship/married but living apart 4, In a relationship/married and cohabiting

education	What is your highest level of educational attainment?	1, No qualifications 2, Completed GCSE/CSE/O-levels or equivalent (at school till aged 16) 3, Completed post-16 vocational course 4, A-levels or equivalent (at school till aged 18) 5, Undergraduate degree or professional qualification 6, Postgraduate degree
employment	What is your employment status?	1, Still at school 2, At university 3, Self employed 4, In part-time employment 5, In full-time employment 6, Unable to work due to disability 7, Homemaker/full-time parent 8, Unemployed and seeking work 9, Retired

keyworker	Are you currently fulfilling any of the government's identified 'key worker' roles?	1, Health, social care or relevant related support worker 2, Teacher or childcare worker still travelling in to work 3, Transport worker still travelling in to work 4, Food chain worker (e.g. production, sale, delivery) 5, Key public services worker (e.g. justice staff, religious staff, public service journalist or mortuary worker) 6, Local or national government worker delivering essential public services 7, Utility worker (e.g. energy, sewerage, postal service) 8, Public safety or national security worker 9, Worker involved in medicines or protective equipment production or distribution 10, None of these
country	In which country do you currently live?	1, England 2, Wales 3, Scotland 4, Northern Ireland 6, The USA 5, Other
area	What type of area do you live in?	1, City 2, Large town 3, Small town 4, Village 5, Hamlet 6, Isolated dwelling

living	What type of place do you live?	1, House 2, Room(s) in shared house (e.g. as a lodger) 3, Flat in flat block 4, Student halls 5, Residential home 6, Other
ownership	Which describes the home you live in?	1, Owned outright 2, Owned with the help of a mortgage 3, Shared ownership (part owned, part rented) 4, Rented 5, Living rent free
garden	Do you have access to any the following where you live?	1, A garden 2, A balcony, small patio, or roof terrace 3, A park, wood, or other green space you can still access within easy walking distance of your home 4, none of the above
rooms	How many rooms are in your home? (not including any bathrooms or toilets. If you live in a shared house only count the rooms that are open to you to use. If you live in a block of flat, only count rooms your flat.)	1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
	How many adults are living WITH YOU in the household?	
houseadults	(Do not count yourself)	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
	"Household" means the people you immediately live with, e.g. in your flat or house. Don't count other people e.g. in your flat block.	

housechildren	How many children are living with you in the household?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
income	What is your usual total household income?	1, Less than £16,000 a year (£310 a week) 2, £16,000-£29,999 a year (£310 - £579 a week) 3, £30,000-£59,999 a year (£580 - £1149 a week) 4, £60,000-89,999 a year (£1500 - £1729 a week) 5, £90,000-119,999 a year (£1730 - £2299 a week) 6, More than £120,000 a year (£2300 a week) 7, Prefer not to say
illness	"Household income" means the money brought in by you and/or your spouse and/or another adult you live with, with whom you share finances. Don't count the income from anybody whose finances are independent of yours. Do you have any of the following medical conditions?	1, High blood pressure 2, Diabetes 3, Heart disease 4, Lung disease (e.g. asthma or COPD) 5, Cancer 6, Another clinically-diagnosed chronic physical health condition 7, Clinically-diagnosed depression 8, Clinically-diagnosed anxiety 9, Another clinically-diagnosed mental health problem 12, A disability that affects my ability to leave the house 13, Any other disability 10, I am pregnant 11, None of the above

smoker	Do you smoke?	1, non-smoker 2, ex-smoker 3, current light smoker (9 or less a day) 4, current moderate smoker (10-19 a day) 5, current heavy smoker (20+ a day)
alcohol	How many alcoholic drinks have you had in the past week (e.g. how many glasses of wine / pints of beer or cider / shots of spirits)?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10 11, 11 12, 12 13, 13 14, 14 15, 15 16, 16 18, 18 19, 19 20, 20 21, 21+
exercise	How many days last week did you do moderate or vigorous physical activity (activity that raises your heart rate and makes you breathe faster and feel warmer) for 15 minutes or more?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7
caring	Do you have caring responsibilities for any of the following? (tick any that apply)	1, Elderly relatives or friends 2, People with long-term conditions or disabilities 3, Grandchildren
pets	Do you have any of the following pets? (tick any that apply)	1, Cat 2, Dog 3, Bird 4, Fish 5, Other
closefriends	How many close friends do you have?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
socfreq	Usually in your life, how often do you meet up with people face to face socially, not for work (e.g. friends, family, relatives or social events with colleagues)?	1, Every day 2, Three or more times a week 3, Once or twice a week 4, Once or twice a month 5, Less than once a month

pers1	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...worries a lot</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>
pers2	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...gets nervous easily</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>

Section 2: Questions asked weekly

Variable name	Question/variable label	Choices/label values
covid	Have you had Covid-19 (coronavirus)?	1, Yes diagnosed and recovered 2, Yes diagnosed and still ill 3, Not formally diagnosed but suspected 4, Not that I know of / No
covidcontact	In the last week, do you believe you have come into CLOSE CONTACT with somebody who has Covid-19 (e.g. living with, hugging, shaking hands with, or spending more than 15 minutes with)?	1, No 2, Yes 3, Unsure
isolationstatus	<p>What is your current isolation status? (tick any that apply)</p> <p>By "staying at home" we mean avoiding leaving the house for everything apart from exercise, shopping for essentials, or medical need.</p> <p>By "self-isolating" we mean staying at home and avoiding contact with any people inside or outside the household.</p>	<p>1, I am living my life as normal</p> <p>2, I am not "staying at home", but I have cut down on my usual activities as a precaution</p> <p>3, I am not "staying at home" specifically, but I have stopped going to work like normal and am working from home</p> <p>6, I am "staying at home" because I have an existing medical condition or am categorised as high risk</p> <p>4, I am "staying at home" as I am worried about spreading it to others or getting ill (but I am not high risk)</p> <p>5, I am "staying at home" to protect a family member, friend or housemate who has an existing medical condition / is high risk</p> <p>8, I am "staying at home" as it has been ordered by the government or local authority as part of a lock down</p> <p>9, I am "staying at home" but this is NOT because of Covid-19 but because of another reason e.g. a pre-existing health condition or disability</p> <p>7, I am "self-isolating" (avoiding contact with</p>

all people as much as I can) due to a diagnosis of Covid-19 or possible infection

isolation_new

What is your current isolation status?

- 1, I am in full isolation, not leaving my home at all
- 2, I am staying at home, only leaving for exercise, food shopping, accessing medication, or essential activity permitted by government guidelines
- 3, I am staying at home, only leaving for exercise, food shopping or accessing medication AND work OR other essential task (e.g. volunteering)
- 4, I am NOT following the stay-at-home recommendations but am adhering to social distancing when in public (e.g. staying 2m away from others)
- 5, I am NOT following the stay-at-home recommendations or social distancing when I am out
- 6, I am leaving the house for more reasons than those listed above but am adhering to social distancing in public (e.g. staying 2m away from others)
- 7, I am leaving the house for more reasons than those listed above and am NOT adhering to social distancing in public (e.g. staying 2m away from others)

leavinghome	<p>In the past week, which of these have you left your home for?</p> <p>[NB some of these activities may not yet be allowed in different UK nations]</p>	<p>1, Exercise</p> <p>2, Buying food or medication</p> <p>3, Other shopping</p> <p>4, Other errands (e.g. taking a child to school)</p> <p>5, Work</p> <p>6, Other essential task (e.g. volunteering)</p> <p>7, Visiting people in a support bubble</p> <p>8, Meeting up with friends or family (not in a support bubble)</p> <p>9, Going out for meals or entertainment</p> <p>10, Day trip or other outing</p> <p>11, Other reason</p> <p>12, I am not leaving my home</p>
isolation_reason	<p>What are the motivations for your current isolation status above? (please tick all that apply)</p>	<p>1, I am worried about catching Covid-19 and I have an existing medical condition or am categorised as high risk</p> <p>2, I am worried about catching Covid-19 but am not high risk</p> <p>3, I wish to protect/shield a family member/friend who is high risk</p> <p>4, I am worried about spreading Covid-19 to others</p> <p>5, It has been ordered by the government (e.g. as part of lockdown)</p> <p>6, Another reason not relating to Covid-19 (e.g. maternity leave, pre-existing illness, or disability)</p> <p>7, None of the above</p>
life_diff	<p>How different has life been for you in the past week compared to life before Covid-19?</p>	<p>1, Entirely the same as usual</p> <p>2, Only a little different</p> <p>3, Quite a few differences</p> <p>4, Lots of differences</p> <p>5, Completely different</p>

daysisolating	In the past 7 days, how many days have you: not left the house or garden?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7
